

Mind over Money... the inner journey to wealth

YOUR INVITATION TO THIS EXCITING 2 DAY WORKSHOP

The Right Mind and Resource Consulting Services are pleased to introduce this new program. It is an exciting and rewarding experience that takes you to a whole new level in understanding your Inner self.

The goal of the workshop is to provide an integrated and emotionally connected approach to wealth creation and its possibilities. By doing this, you learn to make it your responsibility to understand and manage yourself at all levels.

Only too often, we “hold-back” or “boycott” goals and actions that we have set in place without knowing the real reason why, resulting in frustration and anguish. Sometimes our subconscious is self-sabotaging us and we don’t ever know!! This can occur with money, relationships, career, etc.

Your involvement and interaction is essential. You will be....

- Setting the framework for a deeper understanding of yourself:
- Establishing where you want to be through visualisation:
- Engaging in practical steps to change and manage your current behavioural patterns.

The program has been developed by Jill Rigney and David Hanlon of The Right Mind International Pty Ltd. Jill and David have an enviable reputation of providing the knowledge, space and leadership to allow each participant to be fully involved and have valuable take home messages and actions.

The workshop fees cover all course material and day catering. On your registration, we will forward you all the registration details. Notes: That there is a small pre-course questionnaire to be completed prior.

9th and 10th November - Yeppoon
